

## Mixing Equipment : Multifunction Mixer

[Click here](#)

Sower multifunction mixer is a combination of emulsifier, disperser and special anchor-shape mixer. It combines low speed strong mixing with high speed dispersing, which has good adaptability to middle and high viscosity materials. We program mixing and dispersing technique processes, suitable for many materials' mixing, dissolving, dispersing and adjustment. This equipment has a wide application scope, finishing mixing disperse and fine emulsification in one process.

Name	SWD GN multifunction mixer
Model	SWDGN
Specification	It could be vacuum and heating or cooling, The pot cover and the mixer head adopt air lift or hydraulic lift. Material feed-in and eject is more convenient and clean are more convenient compare to others to others machines.
Introduction	Sower multifunction mixer is a combination of emulsifier. disperser and special anchor-shape mixer. It combines low speed mixing and high speed dispersing. Which have a good adaptability to middle and high viscosity materials.
Particular details	Sower multifunction mixer is a combination of emulsifier. disperser and special anchor-shape mixer. It combines low speed strong mixing and high speed dispersing.

	Which have a good adaptability to middle and high viscosity materials. We program of the mix and dispersing tech. process. so that is suitable of many materials-mix. dissolve. dispersing and adjustment. This equipment has a wide application scope. finish the mixing disperse and fine emulsification in one process.
Motor type	AC motor
Power supply	380V,50Hz
Speed adjustment	Various speed adjustment
Material of medium	88304.SS316L
Max. capacity	10.000L
Min. capacity	50L
Seal	Double surface mechanical seal
Vacuum degree	Vacuum degree $\leq$ -0.08MPa
Temperature range	0-300 , $\pm$ 1
Work bracket and base	Standard configuration with bracket
Lift ways	Hydraulic lifting, suggest to use fixation larger than2,000L
Package	Wooden package
