

## Sand Mill : SMA-18.5kw Basket Mill Machines (with cover)

[Click here](#)

This patented high capability equipment combines dispersing with mill function. It features easy clean, less remain, economy and perfect mill effect, suitable for such high fineness demands as coatings, printing ink and paints.

We design and manufacture many sizes of basket mill machines, which cover all the specifications of lab, middle-test and industrial production purposes. Milling batch ranges from 2L to 3,000L, meeting your different requirements.

Category	Dispersing and milling equipment		
Name	Automatic SMA milling basket muller		
Model	Auto SMA	Brand	SOWER
Inroduction	This mechanical and electrical device is mainly used for pigment dyestuff,color paste.printing ink.paint ceramic glaze,inside and outside coating material.such as these chemical industries.It can replace the tradition horizontal type sand mill,three roll machines,pearl grinding machine,and it is the most advanced equipment at present.		

Charactedstic	<p>1)The hermetic lid is environment friend.It could set the temperature and milling time according to different configuration of each batch</p> <p>2)The observe-mirror is convenient for observe the mill state within the hermetic kettle and easy to take out sample from it</p> <p>3)In automatic mode.Yor could supervise the temperature of each batch products.When it exceeds the setting value,there will have alarm.Yor could set three temperature parameters:working temperature,alarm temperature and machine-stop temperature.It could be modify according to different tech request</p> <p>4)In manually mode,it could finish the whole operation manually</p> <p>5)Malfunction take place and weed out could be record for maintain convenience</p> <p>6)Could save many configuration and convenience for calling</p> <p>7)PLC controlling system</p>
Technical Parameter	<p>1) Motor power.7.5KW,15KW,22KW,37KW,45KW,55KW</p> <p>2) Power supply.380V,50Hz;or according to clients"requirement</p> <p>3) Rotate speed:0.1,440r/min</p> <p>4) Capacity 40-2000L,improrted zirconia beads as milling medium</p> <p>5) Diameter of zirconia beads:1.2mm-2.2mm</p>
Lifling ways	Hydraulic lift
Main oversea market	Europe,America,the Middle East,the SoutheastAsia,Africa and so on
Extetal dimension	1720mm*750mm*1710mm
Package	Wooden case,or according to customer's requirement
Packing size	1770mm*800mm*1760mm
Min.order	1 set
Price terms	FOB Shanghai or CIF
